

Talent Reef Onboarding Checklist

All employees are to be onboarded with this checklist prior to being put into Decision Logic and working a shift.

Management Tasks	Completed
Move applicant to hired in Talent Reef from applicant section (Click on name-view/edit – change status to hired – click save)	
Confirm applicant has now received email informing them to log into their Talent Reef account and complete their onboarding paperwork.	
If applicant is not in store completing their paperwork, follow up with them and set deadline for completion. Upon the employee completing their portion of the onboarding process, an email will be sent to the store notifying completion.	
Begin your portion of completing the paperwork. Click on edit employee details (Fill in pay rate type/Fill in pay rate/Fill in start date – click save)	
Click on Forms and complete electronic signature on safety form.	
While in forms click on I-9, review the information the applicant entered in section 1 for accuracy and then complete section 2 of the I-9. Take your time to ensure you enter the proper information from the documentation submitted by the applicant. Any mistakes entered either by the applicant or the manager will cause a result of non-confirmed data when submitting E-Verify.	
Click on E-Verify. You will first need to create a draft and then submit case. Once the case has been submitted, go back to E-Verify to see results. If you receive employment authorized, you can continue the process of onboarding. If you receive a message stating non-confirmed data, you need to contact your DM or Michelle Burns to walk you through next steps.	
Last step is critical – Change the status to completed. If there is any missing information you receive a message stating the items that will need to be completed before the status can be changed to completed. The image below reflects all 100% done and status can be moved to completed.  (Click on name-view/edit -status – completed – save)	
Send direct deposit or Aline/Wisely pay card information to Michelle Burns.	
Employee Entered into Decision Logic. Remember to leave the ALT EE ID field blank in decision logic.
