

Rehire Checklist

Task	Completed
Locate the rehire in talent reef and click on rehire in the view/edit tab under their name.	
The rehire will then appear in the onboarding section of talent reef. Update the hire date and rate of pay in the employee details section.	
The rehire can then log into their talent reef and update any information – critical step is they are to verify that pay information has either remained the same or if it has changed needs to be done. (Changing the status from terminated to onboarding to completed without making any changes will cause original information to pull over to payroll. If information is not accurate it can result in not being paid timely)	
All information is correct move the employee to completed in the view/edit tab.	
In decision logic locate the employee under Operations/Labor Scheduling/Employee Roster/Terminated. Click on employee's name and hit rehire. (Do not enter them into decision logic as a new hire when doing a rehire)	
Complete Rehire payroll form and send to Michelle and copy your DM.	

Termination Checklist

Terminations should be done every Monday by the GM for the prior week.

Task	Completed
Locate the employee in talent reef under Jump To/Employees/Active and click on view/edit tab under their name and terminate.	
Choose an option in the New Status for eligible for rehire/not eligible for rehire/neutral.	
The date of termination is the last day the employee worked. If you are unsure of the date you need to log into Revel/Schedules/Time Worked and scroll back through the days to identify the last day the employee clocked in.	
Click Save.	
In decision logic locate the employee under Operations/Labor Scheduling/Employee Roster and click their name. Click Terminate in the right-hand corner.	
District Managers are responsible for handling all manager terminations.
