

IMPORTANT: Make sure the oil is not hot before you begin, refer to the label on the degreaser and SDS book or safety handling precautions, and allot approximately 1 hour to clean the fryer.

1

EQUIPMENT NEEDED

2

FILTER

Place half sheet tray, 22 qt Cambro and mesh strainer under fryer drain spout. Slowly turn handle to open valve and release oil. Once filled, close valve and repeat process until fryer is fully drained. Set oil aside.

3

CHIP CATCHER

Using 18" tongs, remove chip catcher.

4

DRAIN DEBRIS

Using oil from 12 qt Cambro, carefully pour to fill 4 qt pitcher. Place the 12 qt Cambro with strainer on top under drain. Slowly pour oil from 4 qt pitcher into fryer to drain any remaining debris.

5

DISCARD WASTE

Discard waste from strainer in trash bin and bring strainer to dish to be cleaned with soap and hot water.

6

CLEAN OUTSIDE OF FRYER

Using degreaser and towel wipe down outside of fryer.

7

CLOSE HANDLE, REFILL FRYER

Ensure handle to valve is closed. Pour filtered oil back in the fryer to fill line.

8

TURN BACK ON

Turn fryer on to 350°F

IMPORTANT: Make sure the fryer has been turned off before starting.

1

EQUIPMENT NEEDED

2

DRAIN OIL

Using the fryer oil drain pipe, slowly turn handle to open valve and release oil into oil shuttle.

3

GREASE TRAP

Using oil shuttle, transport oil carefully to grease trap.

4

DISCARD

Discard oil in appropriate grease trap.

5

FILL FRYER

ENSURE HANDLE IS SET TO OFF. Fill fryer with water to fill line and add 16 oz of Kay chemical degreaser.

6

BOIL OUT

Turn fryer to 210°F and allow water to boil for 30 minutes. Do not leave fryer unattended while water is boiling.

7

DRAIN WATER

Once finished, turn handle to open valve and drain hot water into oil shuttle. Discard in grease trap.

8

CLEAN THOROUGHLY

Using a 4 qt pitcher rinse with 4 to 6 gallons of cold water. Use green scrub pad to remove any excess grease.

9

REFILL

Dry fully with cloth towel, then refill with new oil and turn fryer on to 350°F.
